Dear author Your paper is of interest and I think must be published I wish to suggest some minor changes that affect the introduction and the discussion If you can make both sections more consistent it will be a great paper For the introduction we need a general statement about soils, carbon and the multidisciplinary of the soil science see here

Brevik EC, Añó Mataix-Solera J, Añó Pereg L, Añó Quinton JN, Añó Six
And for the discussion you can open your ideas and discussion to the following topics:

- How the carbon affects the soil sustainability

References:

The paper is a good contribution that must be published.

Sincerely,
Artemi Cerdà
